(54) Title: METHOD FOR MEASUREMENT OF TEMPERATURE COEFFICIENTS OF ELECTRIC CIRCUIT COMPONENTS

(57) Abstract: There is described a method and circuit for determining a temperature coefficient of change of a parameter of an electrical component, the method comprising: providing at least one thermally-isolated micro-platform on a substrate; placing an electrical component on the at least one thermally-isolated micro-platform; heating the electrical component; measuring a parameter value of the electrical component at a plurality of temperatures; and determining the temperature coefficient based on the measured parameter values.
